

KHURSANDBEK KAMBARALIYEV

ANDROID DEVELOPER

Tashkent, Tashkent, Uzbekistan, Tashkent, UZ | +998901485242 | kambaraliyevk@gmail.com

Professional summary

Passionate Mobile Application Developer with hands-on experience in building and publishing apps on both Google Play Store and Apple App Store. Skilled in Android (Kotlin, Jetpack Compose, KMM, CMP) and iOS (Swift, SwiftUI) development, with expertise in modern architectures (MVVM, MVI, Clean Architecture) and tools like Firebase, Ktor, and CI/CD pipelines. Graduated with Honors (GPA 4.97/5), combining strong academic excellence with real-world project delivery. Motivated to create scalable, user-focused apps that make a real impact.

Career Experience

KMP Developer | Romchi , Uzbekistan, Tashkent | Nov 2025 – Present

- Developed and shipped three production Kotlin Multiplatform applications for Android and iOS using Compose Multiplatform, maximizing shared code and eliminating duplicate platform work.
- Engineered a full-scale B2B distribution platform for glass and window manufacturers — orders, real-time pricing, warehouse, employee management, and dealer mapping — enhanced with an AI-powered customer-support chat, in-app payments, PDF invoice generation, and AR product visualization.
- Designed and shipped a distributor SaaS for the regional market, integrating ML Kit OCR with CameraX for real-time document capture and parsing during order entry, and dual-mode authentication via Google
- Delivered a subscription-monetized distribution app featuring Google Play Billing for premium-tier access, map-based dealer tracking with Maps Compose, and AR scene rendering for immersive in-app product previews.
- Built a unified technical foundation across all three products — Ktor 3, Koin, Room, kotlinx.serialization, Firebase (Crashlytics, Analytics, FCM), and KVault — ensuring consistent reliability, observability and faster feature delivery.
- Romchi App (Play Store, App Store) <https://romchi.uz/download>

Android developer | YouCloud , Fergana | Nov 2024 – Nov 2025

- Developed and maintained core features of a taxi-hailing app using Kotlin and Jetpack Compose, improving UI responsiveness and overall user experience.
- Collaborated with backend and QA teams to deliver real-time tracking and optimized ride-matching functionality.
- Improved app stability by integrating Firebase Crashlytics and resolving critical crashes, reducing crash rate significantly.
- Participated in launching Super App features (Taxi + Delivery), helping reach 50,000+ active users in the first quarter.
- Enhanced scalability by applying Clean Architecture and simplifying the mention of MVI for broader readability.
- Assisted in automating release processes via GitHub Actions and Fastlane, reducing manual release effort.
- YouCloud App (Play Store): <https://play.google.com/store/apps/details?id=uz.yalla.client&hl=en>

Android Developer | G.Logistics , Remote | Mar 2024 – Dec 2024

- Independently developed a logistics management app from scratch to Play Store submission.
- Built using Kotlin, Jetpack Compose, and Koin for dependency injection, ensuring maintainable code.
- Integrated Ktor for efficient and secure networking, enabling smooth backend communication.
- Implemented order tracking, delivery updates, and real-time notifications based on client specifications.
- Managed the Play Store release process, including signing, versioning, and compliance.
- G.Logistics App (Play Store): <https://play.google.com/store/apps/details?id=uz.khursandbek.glogistics&hl=en>

Android developer | YES TMS (Upwork) , Kiev | Mar 2024 – Nov 2024

- Developed a real-time logistics app with WebSockets for live driver tracking and delivery updates.
- Implemented ML-based document scanning with Google Vision API, reducing manual errors by 30%.
- Collaborated with backend developers to maintain low-latency synchronization for 500+ daily users.
- Contributed to delivery tracking improvements, cutting delays by 30% and boosting operational efficiency.
- Achieved a 5-star client rating for timely and high-quality delivery.
- YES TMS App (Play Store): <https://play.google.com/store/apps/details?id=com.yestms.driver&hl=en>

Mobile App Developer | Muallimi Soniy , Tashkent | Nov 2023 – Feb 2024

- Developed and published a native iOS app with a modern UI/UX, achieving a 4.0+ star rating on the App Store.
- Built with Swift, UIKit, and Core Data to ensure smooth navigation and reliable data handling.
- Collaborated with designers to integrate animations and visual elements, improving engagement.
- Muallimi Soniy (App Store): <https://apps.apple.com/ru/app/muallimi-soniy/id6498893412>

Education

Bachelor | Andijan |

Areas of Expertise

- Kotlin
 - MVI
 - Clean Architecture
 - Ktor
 - WebSockets
 - Kotlin Multiplatform (KMM)
 - Swift
- Jetpack Compose
 - MVVM
 - Koin
 - Retrofit
 - Coroutines
 - Compose Multiplatform (CMP)
 - SwiftUI
